Find food.
Find a way forward.

Food assistance, made easier to find.

ReachAI / Congressional App Challenge

Raman Jamal · Bryan High · 11th grade
Aran Jamal · Davila · 7th grade

A national problem. A local next step.

≈ 1 in 7

U.S. households experienced food insecurity in 2024.

47.9M

people lived in food-insecure households

USDA ERS · 2024 data · 13.7% of households ≈ one in seven

Make the next decision easier.

01

Where can I go?

Source-backed pickup locations.

02

Will it fit my needs?

Pickup times and known requirements.

03

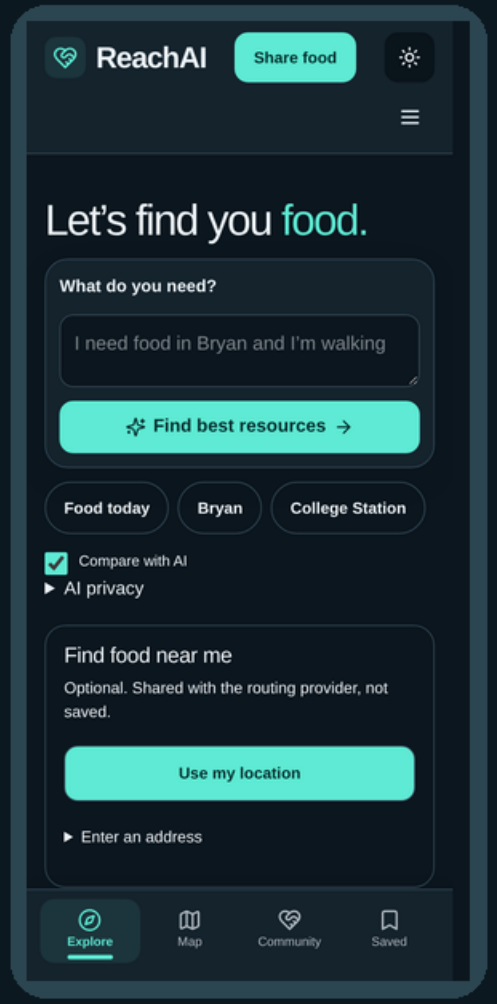

How do I get there?

Location-aware directions and contact details.

Ask in everyday language.

“I need food in Bryan and I’m walking.”

No account needed to search.
Use a location or enter an address.
Keep browsing if AI is unavailable.

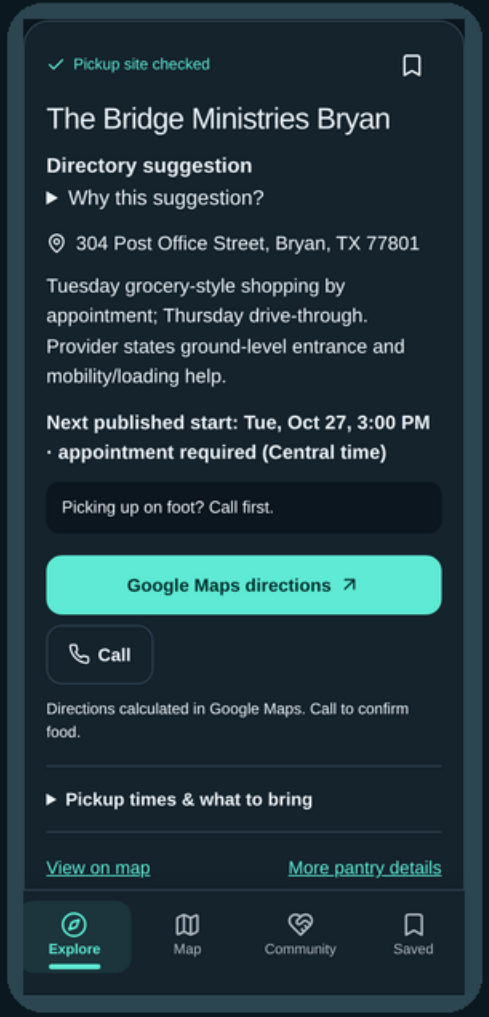

Useful details, not just a pin.

66

maintained food-assistance sites

Pickup address and published schedule
Known requirements and contact details
Source information and uncertainty

Includes restricted programs. Coverage is not exhaustive.

Help explain. Never invent.

Compare real options

Distance, published pickup windows, and known requirements inform comparisons.

Explain the choices

When configured, hosted AI helps interpret requests and summarize listed facts.

Keep a fallback

Directory results remain available when AI cannot respond.

No fabricated locations, live stock claims, or guaranteed “perfect” match.

Share food. Review before publishing.

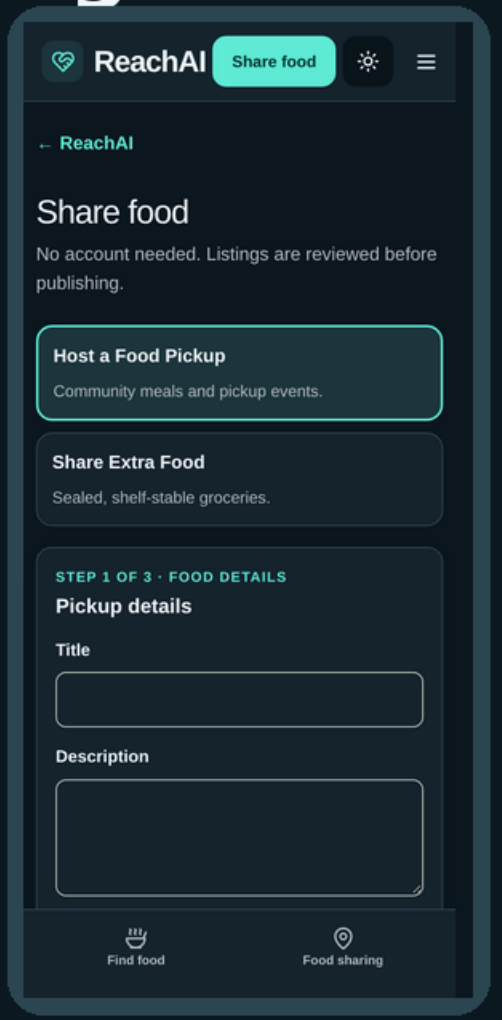

Host a Food Pickup

Community meals and pickup events.

Share Extra Food

Sealed, shelf-stable groceries.

Submit → Moderator review → Public listing

Built for a dependable core.

INTERFACE

Next.js + React

Mobile-first screens

APPLICATION

TypeScript

Search and comparison logic

STORAGE

SQLite

Listings and moderation

EXTERNAL SERVICES

Maps + hosted AI

Honest failure states

Tested software. More fieldwork ahead.

661

unit tests passed

Latest UI check: 14 mobile / desktop checks
TypeScript + production build passed

Next priorities

Test with real users.
Confirm pickup details with providers.
Verify the deployed demo end to end.

Tests do not prove food availability or real-world impact.

From “I need food” to a practical next step.
